

REZIANCE RESINS

REZIANCE ENGINEERED RESINS SOLUTIONS

We are a global a supplier of high-performance resins and a leader in chemical solutions for the casting industry.

Building on our expertise in phenolic resins in both the foundry and industrial resin businesses, we introduced our new product line of phenolic resins REZIANCE to provide you with high-performance products.

The acquisition of the industrial resin business represented a significant milestone in our diversification strategy. Our expanded focus includes a wide range of applications such as friction, abrasives, refractories, impregnation, wood, paints and coatings.

Our technical understanding of the industries, combined with our legacy expertise in industrial phenolic resins, makes us a partner of choice for demanding technical solutions. Our commitment to technical excellence and your satisfaction has always been central.

WHAT DEFINES US: INNOVATION & SUSTAINABILITY

As a global supplier of high-performance industrial resins, we create value for you, our customers worldwide through a strong commitment to innovation and sustainability - alongside a strong local presence.

YOUR GLOBAL PARTNER WITH STRONG LOCAL PRESENCE

**Trend-setting technologies and innovation**

Our customized products and trend-setting innovations are developed effectively and quickly in our research and development centers in Europa, America and Asia. This allows us to offer you tailor-made technological solutions in response to complex problems.

It is important for us to always work hand-in-hand with you in developing successful solutions for the increasingly complex requirements regarding quality, cost efficiency, productivity, and environmental friendliness.

Think globally, act locally

Thanks to our global network, complemented by a strong on-site presence, you benefit from rapid access to state of the art technology as well as the complete technological know-how of our experts.

Committed to sustainability

As a chemical industry company, we see our most relevant contribution in the area of environment – with regard to both our own ecological footprint as well as yours.

For us, sustainability and economic performance complement each other: Our focus on sustainability is closely linked to efficiency, as efficient chemicals and materials make a significant contribution to reducing resources and emissions. Our company's R&D focus is on developing solutions for your that increase efficiency, reduce process costs and minimize environmental impacts.
