

NECOLIN 3100

Alkyd resin based on fish oil

Product properties

NECOLIN 3100 is an oxidative drying solvent based alkyd resin with medium oil length based on fish oil. The fish oil component provides excellent wetting and penetration properties on different substrates.

Wood impregnating coatings based on NECOLIN 3100 have outstanding impregnation properties. In anticorrosive primers the alkyd resin improves adhesion and stabilizes residual rust on rusty surfaces with poor pretreatment.

Application

- Wood impregnation
- Anti-corrosive primers

Analytical data

- Solid content: 69 –72 %
- Oil length: approx. 60 %
- Type of oil: fish oil
- Viscosity: 1.5 – 2.7 Pa.s, 25 °C
- Gardner Color: max. 12
- Solvent: aliphatic hydrocarbon

Packaging and storage

- Packaging: 180 kg drums
- Minimum shelf life: 6 months after delivery in closed original packaging
- Detailed health and safety information please find in the corresponding safety data sheet.
