

NECOWEL alkyd resin emulsions for improved environmental protection and greater sustainability

ASK Chemicals is presenting its VOC-free and sustainable binder to the North American paint & coatings market at ACS 2024

Hilden, April 9, 2024 – ASK Chemicals, a global player in high-performance phenolic resins and a leader in foundry chemicals, will be showcasing its VOC-free and sustainable binder developments at the upcoming American Coatings Show.

ASK Chemicals sets the focus on new developments of binders for industrial coatings, supplemented by the offer for the formulation of decorative coatings. Central to their presentation are the NECOWEL alkyd resins, renowned for their environmental friendliness, workplace safety, and superior performance. Visitors can explore new solutions for wood protection, trim paints, and advanced 2-component systems, all reflecting ASK Chemicals' commitment to innovation and industry standards.

In addition, ASK Chemicals will be presenting its range of REZIANCE industrial phenolic resins, which have been developed for a variety of industrial applications.

Visitors to the American Coatings Show are welcomed at ASK Chemicals' booth, stand 661 to learn more about the NECOWEL product line along with other solutions for the industry. The ASK team will be onsite to answer questions and share knowledge about the wide range of applications for their products.

ASK Chemicals anticipates connecting with formulators at the American Coatings Show, Booth 661, Indiana Convention Center.

ABOUT ASK CHEMICALS:

ASK Chemicals Group, headquartered in Hilden near Düsseldorf (Germany), is a global supplier of high-performance industrial resins and materials. The company's products are mainly used in foundries and in the production of friction, abrasives, refractories, impregnation, coatings, insulation and composite materials.

The Foundry division offers an exceptionally wide and innovative range of foundry consumables including binders, coatings, risers, filters, release agents as well as metallurgical products such as inoculants, inoculation wires and master alloys for iron casting.

The Industrial Resins division is a leader in the field of specialty phenolic resins. Our phenolic resins are the preferred choice when it comes to meeting the highest requirements in the areas of fire protection, energy consumption, service lifetime, health, and safety at work.

The company has a production and sales network in 22 countries and employs approximately 1800 people worldwide. ASK Chemicals Group sees itself as a driving force of industry-specific innovations with research centers and laboratories in Europe, Asia, Americas and Africa.
